# AUTEN PEONIES

## A NEW ERA IN COLOR

1. CLEAR, UNFADING REDS.
2. NEW NOVELTY SHADES.
3. BRILLIANT SPECIES HYBRIDS.

**EDWARD AUTEN, JR.**

**PRINCEVILLE, ILLINOIS**

AUTEN ORIGINATIONS have received more official awards from the Seedling Committee of the American Peony Society than those of any other grower. The 140 varieties cover the entire range of color from white to darkest red; all types, Single, Japanese, Double; early season to late. They are the result of 20 years of carefully planned breeding and selection from many thousands of new seedlings, and today constitute the most important offering to the public in point of real advance in color and types.

## AUTEN PEONIES ARE DIFFERENT

For Permanence, Plant Peonies. We send out healthy roots, true to name, grown in fresh fertile black prairie soil; good 3 to 5 eye divisions fresh dug and properly cut to insure quick development into fine new clumps. A healthy root planted in proper soil and location should last a lifetime. First cost should be last cost. It pays to start with the best. Our prices are low, our quality high.

## PLANTING DIRECTIONS

**IMPORTANT**—Open your package of roots immediately when they arrive. Plant as soon as possible but if you have to wait a few days, either keep moist in open box in cool cellar, or better yet, bury in garden.

**Plant Peonies** in good, well drained soil, in full sun if possible, and away from trees, buildings, etc. Do not plant where a peony has been before, unless all old soil is taken out and replaced with fresh. Plant 3 to 4 feet apart; set so that the eyes point upward and are 2 to 3 inches below the top of ground (very important). Give each root 2 quarts of water when planted, and then make a 6 inch mound of dirt above ground level to prevent heaving, scrape mound away late next spring. The use of animal manures is dangerous. Bone meal one year and hard wood ashes the next is better.

**TERMS**—Cash with order. Prices include delivery in U. S. east of Rockies on orders of \$2.50 or more. Under \$2.50 add 25c for postage and packing. Pacific coast orders under \$10.00 sent express collect. Canadian orders, add 25c for postage, large orders sent charges collect. Send import permit, and remit in U. S. exchange. Any complaint as to condition of roots must be made immediately upon receipt of package. We make no warranty as to growth as we do not control conditions nor care in our customers gardens. This list cancels all lists prior to July 1, 1938.

**SHIPMENT**—Beginning Sept. 1, until ground freezes. Fall planting is best.

**SPRING SHIPMENTS**—We can furnish most varieties in early spring if we have your order by April 10, digging up dormant divisions planted outdoors the previous fall. These should be in much better condition than roots stored all winter in some cellar or bin. We do not store roots over winter.

## Standard List, Selected Kinds

Here at very low prices are offered the best of the older varieties proven by long trial, and a few of the very newest. You may order with confidence from this list.

Numerical ratings are not given, as they do not always indicate value of a variety in different parts of the country. People living as far south as St. Louis should choose mostly early doubles and the singles and Japs. Varieties I consider most desirable are marked with two stars \*\*, those above the average with one star \*.

## 1938 Introductions. Auten Originations

This year we are offering five new peonies, very distinct from any now in commerce, as follows:

**Joyce.** Late pink double.

**June Brilliant.** Late red double.

**Lucky Star.** Late dark red double.

**Signal Station.** Late red Jap.

**Topeka.** Red bomb. Very early Officinalis hybrid.

These will be found listed in their proper classification among the other Auten Originations.

## NEW SEEDLING PEONY FREE

With all orders of \$5.00 or more, if requested when order is given.

No. 772. A seedling of Marie Crousse, which from recent work seems to be the probable parent of that glorious pink, Walter Faxon. No. 772 is a very fine shade, suggestive of Walter Faxon, and a perfect bloom is a beauty. However, it has a very weak stem and some years might not open, so I shall not name it. But it will give a thrill to any one who appreciates fine color.

## EARLY FLOWERING SPECIES

Every garden should contain some of these early bloomers. They cover a period of about 16 days before the common varieties start.

- Anomola (Smouthii).** The earliest in this list. A purplish red single. The 'cut-leaved' Peony. Makes a plant the size of the regular kinds with leaves gracefully cut. By taking off the seed pods after blooming, one has a foliage effect for the rest of the season as fine as a large fern.....\$ 1.00
- Officinalis Red Jap.** Typical Japanese bloom, color and type of plant same as Officinalis Rubra, but it blooms about 4 days before the latter..... .75
- Officinalis Rosea Plena.** Pink double, blooms with Officinalis Rubra..... .75
- Officinalis Single Red.** Blooms about 3 days before Officinalis Red Jap. The same plant habits and color as Officinalis Rubra..... .75
- Officinalis Rubra.** The best known of the Officinalis species. The "Grandmother's early old fashioned double red" which brings back old memories to so many of us. It blooms about 5 days before the earliest regular (Chinensis) variety..... .50

## DWARF PEONIES

While some Peonies will grow four feet tall and make large bush-like effect, there is also a place for dwarf plants, two feet or less in height; in the foreground, in small flower beds, in very small gardens in small backyards, and as specimen plants. The following Auten originations are true dwarfs. They are listed in their proper classification elsewhere.

**Flower Girl.** White double.

**Peggy.** Pink double.

**Rosalie.** American Beauty red. Novelty double.

**Rosedale.** Officinalis Hybrid, red.

## MINIATURE PEONIES

This year at the National show classes were made for new Miniature Peonies. We entered two red doubles, and both received awards. You will find them listed among the red doubles, June Brilliant and Lucky Star. While small for Peonies, they would be considered enormous if roses. They are of especial value for table decoration, and mixed bouquets of smaller flowers. Extreme size is one of the less important requirements for a good Peony. Creve Coeur, red Jap, is another fine miniature, \$2.00. We can also supply Nos. 847 and 901, tiny red Japs blooming at different times, 75c each, three roots for \$2.00. All these are on tall plants.

## NOVELTY COLORS

These supply much needed variation in tone. They liven up the garden picture, and give surprisingly brilliant and different effects indoors. They naturally carry some purple and may fade some at the end, but are still very much worth-while. We have many other Novelty varieties under trial. Write us.

## OFFICINALIS HYBRIDS

These hybrids, secured by crossing the *Officinalis* species, which is early, on the common species (*Albiflora* or *Chinensis*) comprise one of the most outstanding additions to the list of fine Peonies. They give a full ten days season of bloom before the common Peonies start, in all types, single, Japs, semi-double and double; and in new shades of light to dark coral, cherry, salmon, and orange, together with clear dark reds finer than any other red Peonies in commerce. As yet no whites have been secured. The work takes many years, and many kinds are not yet available in numbers sufficient to offer for sale.
